

Laurence Rebadulla

Senior Software Engineer | AI Developer

glrebadulla@gmail.com glrebadulla.com linkedin.com/in/laurencerebadulla github.com/renzyndrome Philippines (Remote, UTC+8)

SUMMARY

Senior Software Engineer with 9 years of experience building web applications and backend systems, mostly in Python, Django, TypeScript, and React. Shipped products in media, telehealth, government, and telecom, owning features end to end: database design, APIs, frontend, and deployment on AWS. Recent work includes production features built on the OpenAI API. Has worked remotely with international teams since 2023 and needs little supervision to deliver.

TECHNICAL SKILLS

Languages	Python, TypeScript, JavaScript, SQL
Backend	Django, Django REST Framework, FastAPI, Flask, Node.js, Celery, Redis, REST API design
Frontend	React, Next.js, TanStack (Start, Router, Query), Vite
Cloud and DevOps	AWS (EC2, S3, Lambda, RDS, API Gateway, CloudWatch), Docker, Linux, CI/CD, Cloudflare Workers and R2, DigitalOcean, Linode
Databases	PostgreSQL, MySQL, MongoDB, Firebase, Supabase
LLM Integration	OpenAI API, embeddings and retrieval (RAG), LangChain, Claude Code
Other	Dart/Flutter, Odoo, Microsoft Dynamics 365, Agile/Scrum

EXPERIENCE

Senior Full Stack Developer

2024 - Present

US-based Media Company (Remote)

- Built a real-time analytics dashboard in Python that tracks creator revenue, engagement, and growth, with automated alerts through the Telegram and Discord APIs. The content team uses it daily instead of pulling reports by hand.
- Added LLM features to internal tools through the OpenAI API: content suggestions, automated reports, and plain-language search over analytics data.
- Built retrieval pipelines with OpenAI embeddings and LangChain so those tools answer from company data instead of generic model output.
- Built a social media automation service in Python and FastAPI for content scheduling and engagement workflows, deployed on AWS (EC2, S3, RDS, Lambda).
- Co-built a creator management platform in React and TypeScript with content scheduling, post management, and mass messaging.

Senior Full Stack Developer

2023 - 2024

Connect Psych Services (Remote)

- Built a telehealth platform where employees book and meet mental health practitioners over live chat, voice, and video, using Python, Django REST Framework, React, and Next.js on AWS.
- Improved backend APIs and frontend UI for reliability and performance based on monitoring and user feedback.
- Worked in two-week sprints with a distributed team and reported directly to stakeholders.

Software Developer, promoted to Senior Software Developer

2020 - 2023

LITS

- Led development of an E-Legislative System in Python, Django, and JavaScript that moved local government workflows online, covering bill drafting, committee deliberation, and public hearings.
- Customized Odoo Enterprise to deliver CRM, Website, and HRIS modules that replaced manual processes.
- Promoted to Senior Software Developer for technical leadership and consistent delivery.

Junior Software Engineer

2018 - 2019

Infoshift Inc.

- Maintained public developer APIs for one of the largest Philippine telecom providers, covering SMS, voice, location, rewards, geofencing, and USSD.
- Ran the APIs on Flask, Node.js, and AWS (EC2, API Gateway, Lambda) in a microservices setup.
- Wrote the API documentation and onboarding guides used by external developers.

EDUCATION

Bachelor of Science in Information Technology, Polytechnic University of the Philippines

2013 - 2017
